

Recombinant ecology an  
 immeasurable splinterhead,  
 distances farm cross-grained  
 at a prematurely fused  
 reference: these rurals  
 arrive fully fuelled

compression contra abstin-  
 ence, biofigits sought at length,  
 how the corridors  
 withdraw, reappoint

pastoral overheads drain  
 canopies in stock, remote  
 on/off storage, shelf-life  
 inherits natural succession,  
 plant-like assemblies from  
 receding mesh, fitted in-  
 ertia undertakes the occupation

city serial homes prevailing  
 in stem, their root-hairs  
 so numbered, forgo  
 other wars in a commission  
 this near, observe the basics  
 even when without adoption

gleanings where no harvest  
 was ever planted, every  
 happening given back to  
 a nothing of the expanse:  
 conspicuous escort rakes  
 the city along green bands,  
 siphons a non-elision,  
 the common scarcity

anthropic geo-cavity re-  
 hearsing biodiversity  
 (given its neo-density)  
 open baiting of unfrequented

horizon, true low level pledge  
in an already surpassed

enregions a less begun,  
its legioning sets  
nest at nil requirement,  
offer city that dearer  
perimeter than its  
travail can exhale

a suite of human survivals  
siteless so far ahead,  
living between a green  
wedge and the pressure of  
whole para-locations

neighbourhood appeasement  
in quiets of abrupt rest, urban  
untroddens correctly  
where they do not go

Scarce fleece of clover on the central reservation, concrete proof that urban  
wildlife downgrades to rural shallow

diversity's 'endless village' overgoes array on this fair field once station one  
was destroyed, find it scarringly along the city cycle, seconds of nature at the  
radiative stroke

leaving aside the botany, scenery makes clean classed secondary once primary  
damage is disused

unarmed leaching deep into foliar darts remarkable comers, all of whom take to  
the proximity

heath in band put to park, hardly ever cultivated but sustained to a humanly mild  
abuse

main refuge for old sentient habits of conurbation green-ribbed on carded  
layout, best rest for a while

sole spiteless site, missing little from forbidden massings or any other rarity, now  
housing accords to tender asides

highest loss among species craving ground disturbance, in case the tranquillity of  
surrounding suburb has no grab casuals escalate and then fade from unfenced  
gardens

fragments of heath prizing ground towards slugged at emplacements, that a  
botanical hotspot should be driven cool by city lungs at golf detecting unlimited  
field can no longer insulate a flora chase across that population's greens

the city only screen-palpable where famished to protective edge park-badges  
forning a micro-plenitude of immersion

city-fast in fossil drive

vast hosts

awarding slender host

a para-attired pastoral

cry of wildfowl

faintly requited

hearkens off squandering

onto a tree

bowering

in shrillness

steerage thicket, almost

percussive radiance

suddenly crashes (bushes)

with scenic receptacle

Heath prying into its lyrical tent,  
sustainable self-invisibility

inflorescence signing bright unmistakables,  
close inspection-remnant of the old pledge

cindery mounds coveting re-  
versionary colonisation, trust  
between the lip of a claypit  
and erratic accessions of wood

in-channel pools and riffles  
floristically full at an after-blain

where urbanisation dives  
for no human help, spell  
out the survival nodes

coalescent emergency ribbons  
a green inference: less of ours  
in the more to be given
