

How to present

General thoughts

- Learn off by heart
- Practice difficult words
- Face the audience
- Don't hold pen/ fidget hands
- Think about the number of words per slide
- Pictures on slides are good
- Have diagrams/ graph to explain formulae
- Reference quotes

Questions

- Why did you choose that method to investigate the problem?
- What real world cases are you modelling?
- How did you choose the input variables for your model?
- What question are you seeking to answer?
- What is the motivation behind this model?

Main sections/ Themes

- Title
- Motivation
- Choice of model
- How the results were obtained
- Results
- Conclusions
- Further areas of investigation
- Thanks
