David Firth
WDSI Director and ATI Faculty Fellow
http://warwick.ac.uk/dfirth

Current and next 'data science' interests include:

▶ General approaches to scalability of statistical models and associated software (with Ioannis Kosmidis, ATI/UCL)

▶ Scalable 'scoring' in massive pair-comparison networks. Applications of this are in commerce, bibliometrics, sport, etc. (with David Selby, Warwick Statistics PhD student)

▶ 'Sports analytics' more generally (with Ioannis Kosmidis, ATI/UCL; and Heather Turner, Warwick Statistics)

▶ Bibliometrics and research assessment (with David Selby, Warwick Statistics PhD student; and Daniel Sgroi, Economics)
