

1. Molecular complexes. Part XI. Crystal and molecular structure of 1:1 complexes of 1,3,5,-trinitrobenzene and bis-(N-t-butylsalicylideneiminato)-cobalt(II), -nickel (II), and -copper(II).  
E.E. Castellano, O.J.R. Hodder, C.K. Prout and P.J. Sadler  
*J. Chem. Soc. (A)* **1971**, 2620-27.
2. The effect of 1,3,5-trinitrobenzene on  $^1\text{H}$  nuclear magnetic resonance and electron paramagnetic resonance spectra of some cobalt(II) porphyrins.  
H.A.O. Hill, P.J. Sadler and R.J.P. Williams  
*J. Chem. Soc. Dalton* **1973**, 1663-67.
3.  $^1\text{H}$  Nuclear magnetic resonance investigation of the formation of molecular salicylideneiminato-cobalt(II), -nickel(II), -copper(II), and zinc(III) complexes with 1,3,5-trinitrobenzene.  
H.A.O. Hill, D.J. Horsler and P.J. Sadler  
*J. Chem. Soc. Dalton* **1973**, 1805-1809.
4. The molecular structure of porphyrins/caffeine complexes in solution: the interaction of metal porphyrins with various steroids.  
H.A.O. Hill, P.J.Sadler and R.J.P. Williams  
*Ann. New York Acad. Sci.* **1973**, 206, 247-67.
5. A magnetic resonance study of metal-porphyrin/caffeine complexes.  
C.D. Barry, H.A.O. Hill, P.J. Sadler and R.J.P. Williams  
*Proc. R. Soc. London A.* **1973**, 334 , 493-504.
6. Molecular structures of porphyrin complexes in solution. A  $^1\text{H}$  nuclear magnetic resonance spectroscopic investigation of the interaction between 2,4,7-trinitrofluorenone and nickel(II) and cobalt(II) mesoporphyrin IX dimethyl esters.  
C.D. Barry, H.A.O. Hill, P.J. Sadler, R.J.P. Williams and B.E. Mann  
*J. Amer. Chem. Soc.* **1973**, 95 , 4545-4551.
7.  $^{13}\text{C}$  Magnetic resonance study of the ionization of N-acetyl-DL-proline in aqueous solution.  
G.R. Bedford and P.J. Sadler  
*Biochim. Biophys. Acta* **1974**, 343 , 656-662.
8. The effect of chloroplatinite on the  $^1\text{H}$  NMR spectrum of ribonuclease. Solvent-

- accessibility of methionine residues.  
P.J. Sadler, F.W. Benz and G.C.K. Roberts  
*Biochim. Biophys. Acta* **1974**, 359, 13-21.
9. NMR Spectroscopy in biological sciences.  
P.J. Sadler  
*Progress in Medicinal Chemistry* **1975**, 12, 159-190.
10. Nuclear magnetic resonance spectroscopy of cobalt(II) porphyrin-quinone complexes.  
H.A.O. Hill, B.E. Mann, P.J. Sadler and R.J.P. Williams  
*Biochim. Biophys. Acta* **1976**, 430, 413-8.
11. The biological chemistry of gold. A metallo-drug and heavy atom label with variable valency.  
P.J. Sadler  
*Structure and Bonding* **1976**, 29, 171-219.
12.  $^{13}\text{C}$  Nuclear magnetic resonance detection of thiol exchange on gold(I): significance in chemotherapy  
A.A. Isab and P.J. Sadler  
*J.C.S. Chem. Comm.* **1976**, 1051-2.
13. Reactions of gold(III) ions with ribonuclease A and methionine derivatives in aqueous solution.  
A.A. Isab and P.J. Sadler  
*Biochim. Biophys. Acta* **1977**, 492, 322-30.
14. Solvolysis of *cis*-[Pt(NH<sub>3</sub>)<sub>2</sub>Cl<sub>2</sub>] in dimethyl sulphoxide and reactions of glycine with [PtCl<sub>3</sub>(Me<sub>2</sub>SO)]<sup>-</sup> as probed by  $^{195}\text{Pt}$  nuclear magnetic resonance shifts and  $^{195}\text{Pt}$ - $^{15}\text{N}$  coupling constants  
S.J.S. Kerrison and P.J. Sadler  
*J.C.S. Chem. Comm.* **1977**, 861-3.
15. Distribution of a platinum anti-tumor drug in HeLa Cells by analytical electron microscopy.  
M.U.A. Khan and P.J. Sadler  
*Chem. Biol. Interactions* **1978**, 21, 227-32.

16. X-Ray crystal structure of sodium bis(N-methylhydantoinato)gold(I) tetrahydrate; a linear, planar complex of pharmacological interest stabilised by two nitrogen ligands.  
N.A. Malik, P.J. Sadler, S. Neidle and G.L. Taylor  
*J.C.S. Chem. Comm.* **1978**, 711-12.
17. The convention for referencing platinum-195 NMR shifts and the cooperative shift effect for chloro-bromo complexes of Pt(IV) and Pt(II).  
S.J.S Kerrison and P.J. Sadler  
*J. Magn. Resonance* **1978**, 31, 321-5.
18.  $^{113}\text{Cd}$  Nuclear magnetic resonance of metallothionein : non-equivalent  $\text{CdS}_4$  sites.  
P.J.Sadler, A. Bakka and P.J. Beynon  
*FEBS Lett.* **1978**, 94 ,315-8.
19. Multimetal centres: powerful devices in biology and pharmacology.  
P.J. Sadler  
*Inorganic Perspectives in Biology and Medicine* **1978**, 1, 233-259.
20. Platinum complex containing a four-membered ring  
I.M. Al-Najjar, M. Green, S.J.S. Kerrison and P.J. Sadler  
*J.C.S.Chem. Comm.*, **1979**, 311-2.
21. Trans effect in platinum(II) complexes:  $^{195}\text{Pt}$  nuclear magnetic resonance of  $^{15}\text{N}$ -labelled amine complexes  
I.M. Al-Najjar, M.Green. S.J.S. Kerrison and P.J.Sadler  
*J. Chem. Research (S)* **1979**, 206-7.
22. Inorganic elements in biology and medicine.  
N.J. Birch and P.J. Sadler  
*Roy. Soc. Chem. Spec. Per. Rep. Inorganic Biochemistry* **1979**, 1, 356-420.
23.  $^{31}\text{P}$  Nuclear magnetic resonance as a probe for the interaction of gold phosphine drugs  
N.A. Malik and P.J. Sadler  
*Biochem. Soc. Trans.* **1979**, 7, 731-732.
