

Welcome from Project Manager: Walter Miseleni

On this maiden newsletter, I would like to take the opportunity to thank all stakeholders that are contributing to make the 2006/2007 Warwick Formula Student not only a reality, but a success. I thank you deeply for trusting us to deliver. Thanks also the members of the steering committee, and the technical experts that have generously given their time to help us stand on our feet.

As we come to the end of our concept review phase, I am proud to say that we are on track to passing the concept design review stage. Well done, and lets maintain the sense of urgency with which we have achieved this progress.

Uni students behind project

During the second week of term the Warwick Formula Student Team took the W5 car onto the University of Warwick piazza, the central point for socialising on campus. During the two day event we displayed footage from last years competition and promoted the car to students and to the visiting companies at the University's careers fair.

The event was a success, with many students showing their interest and support for the project by purchasing raffle tickets and joining our mailing list.

Following from the success we now plan to continue similar events, which raise the profile of the project and our sponsors whilst getting the university behind us.

W6 team up and running!

With concept definition stage drawing to a close the team has worked hard to produce a clear path of where we wish to go. We have taken on the challenge with great enthusiasm, and have had significant successes across all departments. CAD design of the chassis is complete and work towards manufacture is expected to be completed by the end of the month. With such a wide range of successes so early in the design phase we are confident we are capable of achieving our target of finishing within the UK's top 5 teams.

A-Level Students Visit Warwick Formula Student

As one of the most exciting fourth year projects run by the school of engineering the team spent a morning showing prospective students and their parents to the university around the pits and talking about the car.

The current A-Level students were excited by the car, and eager to ask questions about the challenges we face. We took the morning as an opportunity to start up our mule car, testing out suggested improvements and running some development tweaks.

Sponsorship!

Warwick Formula Student is run purely on student funded sponsorship. If you would like to become part of this prestigious project please contact Adam Falgate. A.falgate@warwick.ac.uk

Competition!

Interested in winning a track day round Silverstone, a half day off road driving experience or having your name on the 2007 Warwick Formula Student Car? Then enter our raffle....£1 a ticket.
