

Summer School on Health Technology Assessment (HTA)

10th September 2015, 12:45-14:00

School of Engineering, room 105

Dr. Leandro Pecchia

University of Warwick and Chairman of the HTA Division of the IFMBE

Title: “Early stage HTA: how to inform the research aiming to maximise its impact”

Abstract

In this lunch seminar, Dr Leandro Pecchia will summarise the main messages of the Summer School. The main methods and tools presented during the School will be briefly recalled and the main problems of HTA of medical devices will be discussed. Finally, open challenges emerged during the Summer School will be presented too. This will be an opportunity for those that will have no time to attend the whole school to see an overview of its main topics and more in general of the vibrant discussion that is growing very fast in the community of biomedical engineers and medical physicists about HTA.

The talk will be followed by a round table with the other speakers of the Summer School on HTA:

- (Chair) Dr **Marjan Hummel**, University of Twente, The Nederland and Secretary of the HTA Division of the IFMBE
- Prof **Roberto Merletti**, Politecnico di Torino, Italy
- Dr **Mike Craven**, University of Nottingham, UK
- Dr **Christian BOEHLER**, European Commission's Joint Research Centre (JRC), Institute for Prospective Technological Studies (IPTS) in Seville, Spain
