Note: L is vertical separation between two horizontal displacement transducers on the web cleat = 128 mm

Green: indicates linear elastic joint properties

Red: shows joint properties at damage onset*

Blue: indicates joint properties at maximum moment

***Damage Onset is defined in following two ways:**

1. When audible loud cracking noise is first heard.
2. When width of column near centreline of top bolt increases by 1% of its width before loading.
