Being involved in research throughout the general practice journey

Welcome

Prof Jeremy Dale

Unit of Academic Primary Care, Warwick Medical School

WARWICK

The need for primary care research

What is the best possible care that can be provided to patients and families, close to where they live and work, within the limits of available resources?

- Organisation and delivery of care
- Education, training and workforce
- Health promotion, disease prevention
- Patient experience and outcomes
- Use and effectiveness of technologies and treatments
- Rehabilitation and long term management

Research at Unit of Academic Primary Care

Research themes

- Digital health care
- Promoting individual and community health
- Supportive care, palliative care and end of life care
- Medical education and workforce research

Multidisciplinary team

- Clinical researchers, social scientists, behavioural scientists
- GP teachers
- CRN primary care specialty team

- Medical Education and Workforce Research

Education

- Undergraduate
- Postgraduate
- GP Tutors Hub
- GP Careers
- Academic Clinical Fellows (ACFs)

Jeremy Dale

Head of Academic Primary Care

Primary care research and teaching is focused within the Unit of Academic Primary Care. The Unit has a multidisciplinary team of primary care researchers with clinical, social science and behavioural science backgrounds together with a large team of clinical teachers. The Unit works closely with individuals and teams across WMS that have an interest in primary care education and research, and in particular with the Clinical Trials Unit where many large primary care trials are based. You can see our Unit strategy document [here](#).
