

## **New results on diamond**

*M. E. Newton<sup>1</sup> and D. J. Twitchen<sup>2</sup>*

<sup>1</sup>Department of Physics, University of Warwick Coventry CV4 7AL

<sup>2</sup>Element Six, Global Innovation Centre, Harwell Campus, Didcot OX11 0QR

The electronic extended abstract book will be available at the conference. It is, therefore, essential that papers be delivered on time if they are to be included.

It is expected that abstracts will be  $2 \pm 1$  pages of A4 text (including figures and references).

Please make sure that you set the page size to A4.

Please use 12-point Arial font for the main text and set the top, bottom, left and right margins to 2.54 cm or 1 inch. Set the line spacing to 1.1. The text may include figures, equations and tables. Please label all figures, equations and tables clearly and design them such that they will reproduce properly on a screen. All figures should be integrated in the text with sufficiently detailed figure captions.

Please leave the header and footer area clear.

Any references<sup>1</sup> should be indicated in the text<sup>2</sup> and be at the end of the abstract in the order they appeared.

Acknowledgements should follow the main text.
