FLAVOUR WEEK FEEDBACK SUMMARY

Lecturer: Juraj Bracinik and Miriam Watson

1. How did you rate these lectures overall?

(not to my taste)   (excellent)

	0	1	2	3	4	5	6	7	8	9	10
Flavour											
Neutrino											
Astroparticle											
LHC								x			
Detector-Silicon											
Detector-PID											
Detector-Calorimetry											

2. How was the level of content?

(too easy)   (too difficult)

	0	1	2	3	4	5	6	7	8	9	10
Flavour											
Neutrino											
Astroparticle											
LHC					x						
Detector-Silicon											
Detector-PID											
Detector-Calorimetry											

3. Did you like the subject material?

(boring)   (very interesting)

	0	1	2	3	4	5	6	7	8	9	10
Flavour											
Neutrino											
Astroparticle											
LHC								x			
Detector-Silicon											
Detector-PID											
Detector-Calorimetry											

4. Was the subject material useful?

(useless)   (essential)

	0	1	2	3	4	5	6	7	8	9	10
Flavour											
Neutrino											
Astroparticle											
LHC								x			
Detector-Silicon											
Detector-PID											
Detector-Calorimetry											

5. The mix of theoretical and experimental material was

(too theoretical)   (too experimental)

	0	1	2	3	4	5	6	7	8	9	10
Flavour						x					
Neutrino											
Astroparticle											
LHC											
Detector-Silicon											
Detector-PID											
Detector-Calorimetry											

Additional Comments : what was good, less good, what in your opinion should be changed?

-both parts of course were very good. Best lectures were ATLAS/CMS comparison and S.M. results
