5.00pm – 6.00pm**

## ***InnoSchool – Innovative School Concepts for the Future***

**Dr Leena Krokfors  
Professor of Teacher Education at University of Helsinki  
and Director of Centre for Research on Teaching (CRT)**

The goal of InnoSchool is to develop the Future School Concept: a set of research-based good practices, processes, models and designs, and recommendations for their successful combinations in the Future School. InnoSchool consists of four co-projects:

- InnoArch - Places and Spaces for Learning
- InnoEdu - Education with Innovation
- InnoPlay - Innovative Playful Learning Environments
- InnoServe - Service Innovations for the Future School

These co-projects conduct research and developmental work on schools from their different scientific perspectives: architecture and urban planning; playful learning environments; education and the teaching–studying–learning process; and process and innovation management.

See our website for more details:
