

Using Public Graduate Employment Market Statistics (GEMS)

Find out the destinations and salaries of graduates who completed a course at Warwick by using Public Graduate Employment Market Statistics (GEMS), use the drop-down menu to select a **school** and a **subject**.

- [Public Gems](#)

Please consider the following when using this data:

- The data is gathered 6 months after completion of the graduate's course. This gives a useful snapshot of destinations but does not account for those who have not yet decided on or embarked upon their career path.
- The survey only reports a graduate's status on a particular census date, and this may not reflect what they did either before or after that date.
- Graduates pursuing certain careers are required to either undertake further study or non-graduate employment in order to progress, for example on the media or arts sector.

Please note: GEMS is not compatible with Internet Explorer 9.
