

HEALTH & SAFETY MATTERS

Autumn 2023

Hello
Autumn

Welcome! Meet the new members of Health and Safety Services

Gordon Loach: Fire Safety Adviser who joined the team in September 2023.

Monika Prokešová: Compliance Officer who joined the team in October 2023.

Sergio Cespedes: LabCup Project Officer who joined the team in October 2023

Flu Vaccinations 2023

The University of Warwick is rolling out its annual Flu Vaccination Programme.

Please visit the [Flu Vaccination webpage](#) to access all the information on dates and how to book your vaccine.

Health and Safety training reminder

[Mandatory Health and Safety Training](#)

(Fire Safety, Health and Safety Induction and Display Screen Equipment)

for all members of staff is to be completed at induction and every three years thereafter

Hybrid Working

Hybrid working means the ability to spend some time working on-campus and some time working remotely.

If you are carrying out work remotely, or 'working off campus' (i.e., from home or another private setting) and that work involves the use of a computer or laptop then you must complete an assessment of your working arrangements to ensure your health, safety, and wellbeing.

It is a requirement to complete the [Remote Working Assessment](#) annually and discuss any issues or concerns with your line manager.

LabCup

LabCup is a user-friendly inventory system that provides consistent tracking and storage for chemicals within the University, whilst supporting researchers and students to get more done safely.

LabCup has been rolled out to the Department of Chemistry, with a roll out to further departments planned soon.
